The Smartest Choice In Lighting Controls

Decora Home Controls (DHC) offer the comfort and convenience of home security, home lighting control and energy management in one integrated system that does not require expensive rewiring or time-consuming renovation. Designer-styled components replace existing switches and receptacles to provide a whole-house automation system that's easy to install and simple to use. DHC's smart design offers the benefits of "easy living" for people of all ages and abilities.

DHC Turns Any Home Into a Comfortable, Secure Living Environment

The system with the flexibility and reliability to meet the needs of today's homeowners, DHC offers the widest selection of home controls for every application:

- Convenience—DHC's remote control features add the convenience of hands-free light switching at bedtime and the ultimate in home entertainment.
- Security—The system's ALL LIGHTS ON panic button offers a comforting security benefit at night time.
- Energy Management—The system's landscape lighting features can be used to control lighting at programmed intervals to turn outdoor lights ON at dusk and OFF at dawn.

Award-Winning Products from an Established Leader

DHC is the most value-rich system of its kind, offering unmatched performance. DHC's exclusive, award-winning Intellisense™ circuitry reduces line noise interference without compromising system sensitivity, so homeowners always enjoy maximum operating reliability.

The APTitude program demonstrates the benefits of choosing DHC and can be used as both a marketing and training tool.

Leviton has been making electrical control products since 1906. Leviton DHC products meet the most exacting testing and performance standards and are backed by Leviton's Two Year Limited Warranty.

Products that Increase Resale Value

A network of controllers, transmitters and receivers, DHC products use the home's existing AC wiring to control lighting and appliances. Components can be installed during initial construction or retrofit at any time.

Control capabilities are expandable room by room, area by area, as the homeowner's needs and budget dictate. Just add more modules, it's that simple. Plus these controls will make any home more valuable in the eyes of home buyers when it's time to sell.

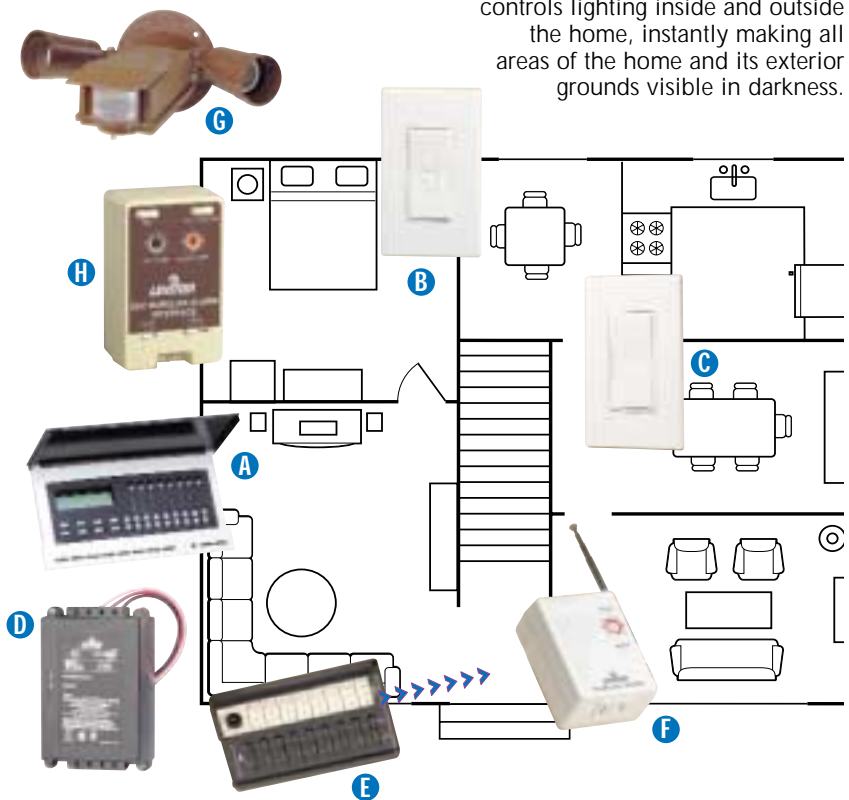

Visit us at www.leviton.com for more information about Decora Home Controls.

Answers to technical questions can be obtained by calling 800-323-8920, Monday through Friday 8:30 AM – 6:00 PM.

Enhanced Security Means Peace of Mind

Police and security experts agree that a well lit home, both inside and outside, is the best first line of defense against break-ins and intruders. DHC can work as a stand alone lighting security system or it can be used in concert with any home security system to provide an extra measure of safety and protection.

For instance, a DHC motion sensor turns indoor and outdoor lights ON whenever motion is detected anywhere over its 4,000 square foot coverage range. When the home security alarm is activated, designated lights flash to remove the cover of darkness and call attention to the house. While occupants are away, programmed light switching gives the home a "lived-in look" that's less predictable than timer-controlled lighting.

A hand-held transmitter (E) controls lighting inside and outside the home, instantly making all areas of the home and its exterior grounds visible in darkness.

Key to Floorplan

- A. DHC Toscana™ Programmer*
- B. One-Address Dimming Wall Switch Controller
- C. Scene-Capable Wall Switch Receiver
- D. System Amplifier Module
- E. Handheld Wireless Remote Controller
- F. Plug-In Transceiver
- G. Outdoor Motion Sensor
- H. Burglar Alarm Interface

Color change kits available for Wall Switch modules

*Available 4th Quarter

Note: A Cat. No. HCA02-10E Amplifier should be installed at the main panel in every DHC installation to ensure adequate signal strength.

Outdoor Lighting Accentuates Landscapes...

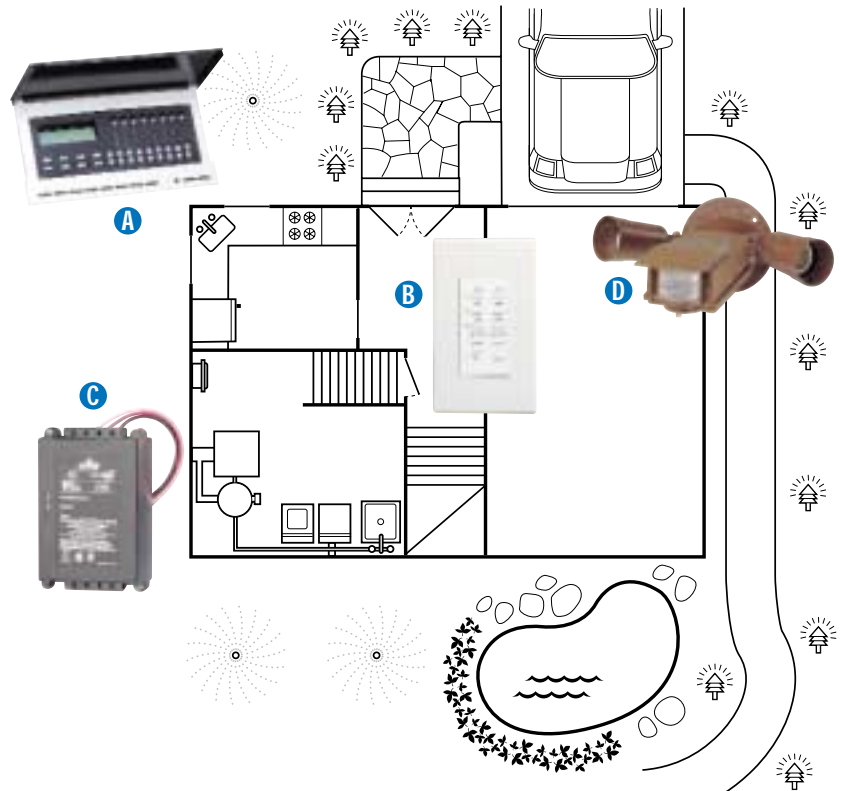

Improves Safety, Security and Convenience

Programmable light switching provides heightened security for outdoor premises. It can automatically illuminate dangerous areas such as walkways, steps and pool areas after sundown. Or it can beautify a landscape and make a backyard or front yard area appear dramatic and inviting. With DHC, homeowners no longer need to switch lights ON and OFF every night.

Pier lights for waterfront property, garage and car port lighting, front lights and pole lights, pool lighting, even driveway gates can be programmed to switch ON and OFF, or can be controlled using a hand-held remote. Shutters and awnings can automatically be raised or lowered to correspond to ambient lighting. Power to garage door motors can be controlled automatically to prevent entry to the premises when homeowners are away.

Dramatic nighttime landscapes, lawn sprinklers and holiday lighting can be conveniently switched ON and OFF to comply with town restrictions or energy management objectives

Transform any Living Area into a Home Theatre

Lights, camera, action... At the touch of a button create a comfortable setting for viewing a favorite movie or catching the game on a Sunday afternoon. The drapes draw closed and lighting dims automatically. No one need get up from their seat to pull the shades, draw the drapes, or dim or turn OFF the lights. Everything is done at the touch of a button. Any stage can be conveniently set by fingertip control—whether for watching television or a home movie, surfing the Internet on a large-screen TV, or kicking back and relaxing to soft music from a surround sound stereo system.

Programmed ON/OFF light switching, manual dimming of groups of lights and automatic scene lighting control is available from a system which makes life easier and more enjoyable and that is easy to use and affordable.

Using a Leviton DHC Toscana™ Programmer* (A), all lighting in an area can be switched ON or OFF at once, or dimmed and brightened at the user's command.

Note: A Cat. No. HCA02-10E Amplifier should be installed at the main panel in every DHC installation to ensure adequate signal strength.

Luxuriate in Comfort

Any homeowner would treasure their own private swimming pool or hot tub, but more often than not, maintaining these luxuries is time-consuming. With DHC's automated control of pool and hot tub filter pumps, a clean, sparkling soak can be enjoyed anytime...hassle-free. And since pool filter pumps can be programmed to run at night, homeowners can spend less time cleaning and more time luxuriating.

Pool pump filters can be programmed to run when the pool is not in use, so homeowners can enjoy more time comfortably relaxing by the pool instead of more time cleaning it.

Homes that Make Sense by Helping to Control Costs

Today's smart homes not only make life easier and more convenient for homeowners, they can actually help to curb energy costs. A DHC smart home can turn indoor lighting ON when it's needed, OFF when it's not. A photocell controller (B) automatically senses approaching darkness and turns outdoor lights ON at dusk and OFF at dawn. Homeowners can call up their vacation homes from any touch-tone phone to set the heating or cooling system to the desired temperature. Dishwashers, washing machines, dryers and sump pumps can all be conveniently run at times most suitable to homeowners, even when they're not at home.

Appliances can be programmed to run at times that are most convenient to homeowners.
